Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2833

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 18, 2005 has been entered.

2. The drawings submitted May 18, 2005 are accepted by the examiner. It is noted that applicant need not submit the entire set when corrections are being made to only a few sheets.

3. The specification is objected to as failing to define a "single-ended signal conductor." Although this term is used in the claims, it is not defined in the specification and is not found to be well known in the art. (The examiner was only able to find one use of this description outside of the present assignee's applications.) It is further noted that there is no identified example of a single-ended signal conductor shown in the figures. Lacking a clear definition, the examiner has defined a single-ended signal conductor as any signal conductor that is not part of a differential signal pair.

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claims 28-32, 41 and 42 are rejected under 35 U.S.C. 102(b) as being anticipated by Fogg, et al. This connector comprises a plurality of contacts 9 and a lead frame 16. Any of the contacts may be selectively designated as the second designation, a first signal contact. In regard to claims 29, 30 and 42, any of the contacts can be designated as a ground contact (end of column 3).

Art Unit: 2833

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Johnston, et al is a further example of a frame holding contacts that can be designated while in the frame.

7. Claims 1-25, 33-40 are allowed.

It is noted that applicant's arguments, concerning the inability to designate the contacts of the devices of Regnier and Bertoncini, were convincing.

In regard to claim 1, 33 and 40, the prior art does not show or teach a connector with lead frame having contacts that may be designated while fixed in the frame to form the first and second designated arrangements, or a method for assembling such a connector.
